

Vaiva Kalnikaite

PHD · FRSA | TRANSFORMATION & INNOVATION LEADER · HEAD OF UX, GENAI

kalnikaite.com · linkedin.com/in/vaivakalnikaite · vaiva@dovetailed.io

PROFILE

Transformation and innovation leader with 15+ years turning emerging technologies - most recently GenAI and agentic systems - into measurable business outcomes. I combine human-centered design, service design, and commercial strategy to map end-to-end processes, run experiments and pilots, and scale the ones that work. As founder and CEO of Dovetailed and Head of UX for SageMaker AI & Agentic Experiences at AWS, I've partnered with business units and technical teams to identify high-value GenAI opportunities, design new AI-enabled ways of working, and embed them from incubation through to scaled implementation - including agentic AI products delivering \$800M+ in revenue. My background across HCI research, product strategy, and startup building gives me a distinct advantage in reimagining complex, highly technical environments so they become more usable, more adopted, and more commercially impactful.

CORE EXPERTISE

GenAI Strategy & Adoption · Business Transformation · Innovation Management · Service Design · Human-Centered Design · Commercial Strategy · Process Mapping · Mixed-Method User Research · Experimentation & Pilots · Pilot-to-Scale Implementation · Change Management · Stakeholder Alignment · Design Leadership · Human-AI Interaction · Agentic AI · LLMs · Prompt Engineering · Human-in-the-Loop Design · Cross-Functional Collaboration · UX & Product Vision · Applied Research · HCI · Designing for Autonomy, Uncertainty & Trust · Evaluation-Driven Design · Behavioral Modelling · Data Analysis · AI Product Design

EXPERIENCE

Head of UX · SageMaker AI & Agentic Experiences

Amazon Web Services (AWS) · Seattle, USA · 2023 - Present

Leading UX, design, and innovation for SageMaker AI and agentic GenAI experiences. Partnering with product, engineering, and research teams to identify high-value GenAI opportunities and guide them through the full innovation pipeline - from opportunity mapping and pilot design through to adoption programs and scaled launches. Drive product and design strategy for human-in-the-loop agentic systems across global teams, champion best practices for GenAI adoption, and run the UX operational reviews that ensure every launch is user-ready. Mentor designers, influence roadmaps across orgs, and present at global conferences on agentic AI UX and the commercial case for human-centered GenAI.

Principal UX Leader · AI Services

Amazon Web Services (AWS) · Seattle, USA · 2022 - 2023

Led UX strategy across multiple AWS AI services - AI/ML Personalization, DeepRacer, AWS Panorama, and SageMaker Edge - setting cross-org vision and building the operating model that raised UX maturity across the organization. Championed new GenAI experiences through hands-on experimentation and shipped them into customer-facing products. Drove change together with highly technical teams and stakeholders across engineering, research, and product.

Principal UX Designer • Alexa Conversational AI

Amazon Web Services (AWS) • Seattle, USA • 2019 - 2022

Creating Alexa experiences and leading the UX design and research of Alexa Conversations and other similar AI driven products. Leading the Design for AI Principles initiative at Alexa. Managing a team of designers and researchers.

CEO • Dovetailed

Dovetailed (UK & US) • 2011 - 2023

Founded and scaled an award-winning innovation and service design consultancy. Led 12 years of client engagements in business transformation, innovation management, and human-centered design - mapping end-to-end processes, running mixed-method user research, facilitating experiments and pilots, and guiding solutions from incubation through to scaled implementation. Partnered with startups and enterprises including Amazon, Microsoft, Beko, Anglian Water, Secondmind, Factmata, Aqilla, Cambridge University Centre for Risk Studies, and Cambridge Cognition - across AI, health, food tech, water, and industrial systems. Combined commercial strategy with applied research to reimagine complex business challenges into new products, services, and ways of working.

Visiting Senior Fellow • Human Experience Design

University College London (UK) • 2013 - 2017

Taught and collaborated on design research, HCI, and interdisciplinary methods. Advised PhDs and partnered on future-focused design programmes.

Head of UX • 3D Plant Design

AVEVA • Cambridge, UK • 2011 - 2012

Pioneered human-centered design and service design for industrial software across energy, manufacturing, and marine. Directed a team of designers and researchers and drove leadership adoption of novel design approaches that reset industry standards. Tracked and measured the commercial impact of design within a \$1.6B revenue business - a large share of which was attributed to work led by my team.

UX Analyst • Geospatial System Design

General Electric • Cambridge, UK • 2010 - 2011

Worked on enterprise UX, improving complex tooling through research and prototyping. Setup a UX design and research team to address challenges when designing GIS systems used by utility companies globally for managing physical network models.

Fellowships & Early Design and Research Roles

Open University • King's College London • Microsoft Research • PARC

EDUCATION

Exec Education, Executive Leadership

Judge Business School, Cambridge • 2016 - 2018

PhD, Human-Computer Interaction

University of Sheffield, UK • 2004 - 2007

BSc & MSc, Computer Science

University of Sheffield, UK • 2000 - 2004
